WORK EXPERIENCE (3 YEARS 6 MONTHS)

Software Engineer / Synchron

DataLab

Jan 2022 — Present

Bangalore, India

- Member of the Synchron.AI division.
- In charge of developing and maintaining microservices and infrastructure for Synchron's AI/ML platform.
- In charge of implementing workflows for advanced analytics.

Associate Software Engineer / Synchron

Analytics BI and DataLab

Jan 2021 — Dec 2022

Bangalore, India

- Developed microservices for internal use and tools for client use.
- Developed end-to-end pipelines for statistical and machine learning use cases and generating useful dashboards for analysis from raw data.
- Worked closely with product owners and experienced the evolution of a product right from requirement-analysis to a deliverable.

Intern / Synchron

Analytics BI

Jan 2020 — Dec 2020

Bangalore, India

- Developed backend for Business Intelligence tools.
- Built and deployed several backend services over AWS.
- Learned and experienced project management, software development life cycle and code organization and maintenance.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering, Bangalore University

72.17%, Distinction

2016 — 2020

PROJECTS AND COMPETITIONS

Offline Kannada handwritten character recognition using Manifold Smoothing and Label Propagation

Bangalore University

Aug 2019 — Sep 2020

Bangalore, India

- Trained neural networks to recognize handwritten Kannada characters.
- Utilized a combination of feature regularization, augmentation techniques and label propagation to reduce reliance on training data, achieving 99.13% accuracy.
- Project URL: <https://github.com/rutu-sh/offline-handwritten-kannada-character-recognition>

ACM ICPC Asia Regional

Bangalore University

Dec 2019

Bangalore, India

- Participated in ACM ICPC
- Qualified for Asia Regional at IIT Kharagpur
- Secured 61 rank

IEEE UVCE Summit-2019

Bangalore University

Mar 2019

Bangalore, India

- Presented ComPhy: Computer Enabled Physiotherapy System.
- Proposed an architecture for a system for physiotherapy using Computer Vision and Range-of-Motion analysis.
- Secured Second Place

E-Yantra Robotics Competition (From IIT-Bombay)

Bangalore University

Oct 2016 — Apr 2017

Bangalore, India

- Participated in E-yantra 2016 [Theme: Cross A Crater]
- Qualified to Stage-2
- Programmed the Firebird-V robot with a mechanical arm developed using servo motors
- Detected the arena using Computer Vision and calculated the moves for the robot to place the boulders and cross the crater.
- Project URL: <https://github.com/ceevaaa/Eyantra-2016>

SKILLS

Programming Languages

Python, C, C++, SQL

Tools and Frameworks

FastAPI, Linux, Docker, Kubernetes, AWS

Communication

English, Hindi, Marathi
